

Handles 4"-12" Pipes w/ Elbows

The **BADGER** - 15k & 22k psi for Pipes w/ Elbows

NEW

4" Elbows

6" Elbows

Superior Design Negotiates Elbows

The **Badger** is the first rotation speed controlled 2-D tool with a positive high pressure seal and replaceable jets that will track around a 4" short radius elbow. Until now your only choices were an expensive rotation device, a leaky seal rotating head or a non-rotating head. The **Badger** changes everything. We are proud to announce two new, larger high-flow members to the **Badger** family, designed for 6" pipes with elbows, featuring adjustable speed control. They are called the **BA-P8** and the **BA-M9**. Note the chart below.
