

The Sabertooth Hose Reel

Dual Hose Assembly for Tube Cleaning

Efficient one-man operation.

Reel eliminates hose hazard.

Banshee Rotary Nozzles

We recommend using our **Banshee** rotary tube nozzles for the best possible results. Note the chart to the right and the entire BN family on pages 26-28.

NEW

Safer & More Efficient Than Manual Methods

The **Sabertooth** hose reel assembly offers a powerful alternative to manual methods when it comes to cleaning heat exchangers, evaporator tubes and other process piping. Our one-man system is more efficient, it's safer and it virtually eliminates stand-by crews. The retractable reel stores the hose and feeds it out so there's no tangle, resulting in a safer work environment.

15k-20k psi Power For 3/4" to 2" Tubes

The **Sabertooth** has easy to use speed and stroke adjustments, plus the hand controls feature a pressure dump. The handy tripod mount and full assembly fit through a 24" man way.

StoneAge® offers an optional Air-Dryer on request.

SABERTOOTH Specs

MODEL	SBT-20k	
Max Pressure	15k or 20k psi	1,000 or 1,300 Bar
Inlet Port	1/2, 3/4 npt or 3/4MP	
Stroke Speed	Fwd 0-1.5 ft./sec	Rev 3.0 ft./sec
Air Supply Req.	100 CFM @ 80 psi	47 l/sec. @ 55 Bar
Min. Tube I.D.	3/4 - 2 in.	19-50 mm
Tube Nozzle	Banshee , BN18, BN24, BN33	
Stroke	60 ft.	18 meters
Weight (complete)	250 lbs.	113 kg

Safe Productive Tube Cleaning

Dual Action System Designed for Vertical and Horizontal Applications

Controlled Feed Rate

The feed of the hoses is controlled by an external gearbox. This simple design allows for quick access.

The **Sabertooth** ends hose struggle, provides greater safety and higher productivity.

Hose Stops

Adjustable hose stops automatically shut down hose travel on both in and out movement.

Convenient Controls

The **Sabertooth** features easy fingertip controls. In and out functions are controlled with a push of the operator's thumb. The handles are adjustable for ergonomic comfort in both horizontal and vertical operations. The left hand controls the dump valve.

Dump Valve & Swivel Connection

The dump valve and swivel connections are easy to access and available in your choice of either 15k or 20k psi. There is also an in-line oiler included for extended air motor life.

Nozzle Guard

The nozzle guard keeps the operator safe from the high pressure jet action. The guard also assists in lining up each new set of tubes. Different models are available to match your hose and tube configurations.
