

20k-40k psi Rotary Shotguns

Barracuda®

Two 20k psi Options plus Two 40k Models

The **Barracuda®** sets the industry standard for speed controlled rotary shotgun tools. **Barracudas®** are available in 15k, 20k, and 40k psi models. These lightweight tools adapt to any high pressure pump and are simple to maintain. The **Barracuda®** is excellent for difficult and irregular surfaces where a hand-held operator can more efficiently maneuver the cleaning head. Our leak-free seal design combined with centrifugal speed control delivers more power to the surface for superior results. We recommend 4-port heads for larger surface areas and 2-port heads for removal of thick deposits. **Barracuda®** self-rotary tools eliminate the need for expensive and complicated compressed air.

The **BC-H9-C** and **BC-H9LF-C** can handle pressures from 28k-40k psi. Both of these models feature 4 jets with speed control rotation. The **BC-H9-C** is for 4-8 gpm and the **BC-H9LF-C** is for 3-4 gpm.

Safe and effective surface preparation.

20k & 40k psi Barracuda® Specs

MODEL	PRESSURE	FLOW	LENGTH	DIAM.	INLET	JETS
BC-K	20k psi	15 gpm	7.8 in.	1.8 in.	9/16 MP	2 x AP4
	1400 bar	57 lpm	200 mm	46 mm		
BC-K-P2	20k psi	15 gpm	7.8 in.	1.8 in.	9/16 MP	4 x AP2
	1400 bar	57 lpm	200 mm	46 mm		
BC-H9-C	40k psi	8 gpm	7.8 in.	1.8 in.	9/16 HP	4 x OS7
	2800 bar	30 lpm	200 mm	46 mm		
BC-H9LF-C	40k psi	4 gpm	7.8 in.	1.8 in.	9/16 HP	4 x OS7
	2800 bar	15 lpm	200 mm	46 mm		

- No air required
- Rotation speed control
- 2 or 4 jet configuration
- Easy field maintenance
- Replaceable nozzle tips
- Less than 3 lbs full weight
- Less maintenance than air-powered tools
